

This distribution control panel required in the electrical lab to perform the experiments. It has following features:-

- + It is housed in M.S. powder coated box.
- + Independent D.P. M.C.B.'s for D.C. Experiments.
- + Independent S.R, T.P. and T.P.N. MC.B.'s for A.C. Experiments.
- + All type of protection relays viz earth fault relay, over current relay, under voltage and over voltage relay, earth leakage circuit breaker
- + with MC.C.B. Of 200 amp are provided on the panel.
- + Independent digital meterings for both A.C. and D.C. side.
- + Separate cable alley provided for both A.C. and D.C. side.
- + Built in control circuit and power on/off.
